

Double Trouble

Lynn Swanson

Linda Waddilove

Us

- 12 bedded unit situated on level 3 of the surgical ward block.

Level Three

Level Two

What happened?

- Multi resistant pseudomonas
- Isolated from the taps
- ? Fit for purpose

Your mission....

- Friday July 1st - create a new CCD to be functional by the end of the day.

What we did

- MIP
- North East Surgery Centre Recovery
- 4 bedded area with potential to expand
- Close unit and reopen when plumber had been

What we did

- New area stripped and cleaned.
- Essentials for each bed space in bed side trolley to take with clean bed.
- Identified other essential equipment to take.
- Drugs

Problems Baldrick Problems

- IT and phones
- Name of area and access
- UPS or not UPS

On the ground

- Units in evolution

Challenge: Space

Challenge: Relatives

- waiting area
- counselling room

...and patients

plus practicalities

- things in the wrong places
- changing clothes
- lack of water

What worked

- Maintaining familiarity
- Timing
- Communication
- Team work

Double Trouble

- Original patients remained on the dirty unit for the whole 17 days of the decant.
- Elective operating continued.

All Clear!

Repatriation

- Planning for 'recant'
- Walk through

Proposed Seating Plan 18:30 16/7/2011

Bed Space	Pateint	Level of Care	Order of move
Bed 1	CLOSED		
Bed 2			
Bed 3			
Bed 4			

In seventeen days of July, with very little warning we....

- successfully implemented MIP (sort of!)
- avoided admissions to a 'dirty' unit
- changed the water supply
- continued normal elective operating

Finally....

- Privacy and dignity
